

# Halis Melih ABAK

## Software Developer

### About

Hello! I am Melih, a software professional who embarked on the journey of software development after graduating in public administration. Following my degree at Dokuz Eylül University in Public Administration, my passion for the world of software led me to pursue the Software Expertise program at Arel University and participate in various bootcamps. During this journey, I focused on React, developed numerous projects, and reinforced my skills with certifications.

Later on, I delved into technologies such as Node.js, Spring Boot, and SQL with the aim of becoming a full-stack developer. Recently, I have been working extensively on Spring Boot and sharing my progress on my Github account. I strive to do my best every day to enhance my skills further.

### Work Experience

#### Frontend Developer

JuniousTech, [04/23] - [10/23]

- Actively participated in educational and financial projects using technologies such as React, Tailwind CSS, and Redux.
- Implemented user-friendly interfaces, bringing project designs to life, contributed to creating an effective collaborative and communicative environment within the project team, demonstrated a fast learning and adaptation ability to align with project timelines.
- Followed best practices to enhance code quality and ensure sustainability.

### Relevant Skills

- Javascript, React, Java, SpringBoot, SQL
- Problem Solving
- Team Communication

## Education History

### **Bachelor Degree of Public Administration**

Institution: Dokuz Eylül University

Year of Graduation: 2022

- Received education in project management, bureaucratic processes, and effective utilization of public resources.
- Completed various courses and applied projects to enhance skills such as communication, negotiation, and crisis management.

### **Software expertise**

Institution: İstanbul Arel University

Year of Graduation: 2023

- Successfully completed the Software Expertise program at Arel University.
- Acquired proficiency in application development using modern technologies such as React, Node.js, and Spring Boot.
- Received training in software life cycle, sustainable software principles, and design patterns.
- Gained fundamental knowledge in database management and SQL queries.
- Through bootcamps and projects, had the opportunity to understand and implement best practices in software development processes.

## Certificates & Bootcamps

**React and Front-End Developer (UDEMiG)**

**Advanced React Training (BTK Academy)**

**React401 (TURKCELL)**

**Springboot & React Fullstack Trainee(eNocta Academy)**

**Advanced algorithms (BTK Academy)**

## Volunteer Experience

- Contributed as a volunteer to online educational initiatives on various platforms, aiming to enhance my personal development.
- Participated in community-based projects and events, contributing to efforts to support the local community.
- Shared my knowledge in the field of software development by answering questions and providing solutions on various forums.
