ABOUT

Hello, I'm I graduated from Dokuz Eylül University with a degree in Public Administration, where I gained in-depth knowledge of public management processes and corporate work discipline.

During my education, I had the opportunity to work for a leading bank for one year. This experience enhanced my understanding of the intricacies and operations of the financial sector. It also provided me with valuable skills in customer relationship management and teamwork.

Following my graduation, my interest in the software industry led me to Istanbul Arel University, where I received comprehensive training in software development. During this period, I had the privilege of completing a six-month internship as a frontend developer at a software company. My experience in the field of software development improved my problem-solving abilities and solidified my passion for technology. Combining my theoretical knowledge in public administration and practical experience in the financial sector with my software development skills, I honed my abilities in effective communication, teamwork, and leadership in diverse environments. This fusion of both worlds has enhanced my capability to tackle complexity and generate innovative solutions.

These skills in collaboration, problem-solving, and successful project completion enable me to make a meaningful contribution to any organization.

CAREER

Customer Relations Department at Kuveyttürk (2020-2021)

During my time working in the banking sector, I gained experience in conveying accurate information to customers and solving their problems. I can use this experience to communicate well with customers and provide them with the best service.

Front-End Developer İntern at JuniousTech(06-2023/09-2023)

During this period, I worked on projects to develop dynamic and user-centric websites and applications, utilizing advanced Front-End skills. Focusing on comprehensive user experience goals, I emphasized effective communication and collaboration within the team. Additionally, I contributed to design and performance optimization efforts.
